10.4 Special Characters 4

11 Summary 4

1 Status

Draft — created to verify all rendering features across PDF and DOCX output.

2 Simple Paragraphs

This is a regular paragraph with **bold text**, *italic text*, and ***bold italic text*** combined. It also includes `inline code` and a hyperlink to verify inline formatting.

Here is a second paragraph to verify spacing between paragraphs. It contains a `LongCodeSpanThatMightBeInteresting` to test inline code styling.

3 Code Blocks

Fenced code block with a language tag:

```
function greet(name) {
  const message = `Hello, ${name}!`;
  console.log(message);
  return message;
}

// Call it
greet('Cognizone');
```

Fenced code block without a language:

```
No language specified here.
Just plain preformatted text.
  With some indentation.
```

4 Tables

4.1 Simple Table

Column A	Column B	Column C
Row 1 A	Row 1 B	Row 1 C
Row 2 A	Row 2 B	Row 2 C
Row 3 A	Row 3 B	Row 3 C
Row 4 A	Row 4 B	Row 4 C
Row 5 A	Row 5 B	Row 5 C

4.2 Table With Inline Formatting

Feature	Status	Notes
Bold header	`done`	Uses *italic* note
Links	done	See cogni.zone
Mixed	pending	Has **bold**, *italic*, and `code`

5 Lists

5.1 Unordered List

- First item
- Second item with **bold**
- Third item with `code`
  - Nested item one
  - Nested item two
    - Deeply nested item
- Fourth item

5.2 Ordered List

1. First step
2. Second step with *emphasis*
3. Third step
   1. Sub-step A
   2. Sub-step B
      1. Sub-sub-step
4. Fourth step

5.3 Mixed Nesting

- Unordered parent
  1. Ordered child one
  2. Ordered child two
- Another unordered
  - Bullet child
    1. Ordered grandchild

6 Blockquotes

> *This is a simple blockquote to verify italic styling and the green left border.*

> *Multi-line blockquote that spans more than one line to verify that longer content wraps properly and maintains consistent styling throughout.*

7 Images

An inline image reference:

Resized via HTML tag (100x21):

8 Horizontal Rules

Content above the rule.

Content below the rule.

9 Headings Hierarchy

9.1 Third-Level Heading (H3)

Content under H3 to verify green color and section numbering.

9.1.1 Fourth-Level Heading (H4)

Content under H4 to verify dark2 color and deeper numbering (e.g. 7.1.1).

9.2 Another H3

Back to H3 to verify counter resets properly.

10 Edge Cases

10.1 Empty Table Cells

Has Content	Empty	Also Empty
Yes		
	Yes	

10.2 Long Content

This paragraph contains a very long inline code span: `this-is-a-really-long-code-span-that-might-cause-wrapping-issues-in-both-pdf-and-docx-output-formats` to verify how both renderers handle overflow.

10.3 Adjacent Lists

First list:

- Alpha
- Beta

Second list immediately after:

- Gamma
- Delta

10.4 Special Characters

Ampersand & angle brackets < > and quotes "double" 'single' plus an em dash — and ellipsis... should all render correctly.

11 Summary

This document exercises:

- All heading levels (H2, H3, H4)
- Section numbering
- Paragraphs with inline formatting (bold, italic, bold+italic, code, links)
- Fenced code blocks (with and without language)
- Tables (simple, with formatting, with empty cells)
- Lists (ordered, unordered, nested, mixed)
- Blockquotes
- Horizontal rules
- Special characters
- Cover page with all frontmatter fields
- Table of contents generation
- Headers and footers
